

Hi there. I'm an experienced professional with over a decade of technical leadership in cross-industry environments — a proven track record of guiding high-performing engineering teams through complex product development cycles while delivering operational excellence. I combine strong programming expertise with strategic vision, and *over the last few years I've built a solid AI skillset* — applying LLMs, agentic workflows, and multi-model orchestration both in production at work and across personal side projects to ship AI-powered features end-to-end.

§ 01

Professional Experience

Signal Limited — Head of Technology

May 2019 — Present

6+ years · Remote · London, UK

- Lead a cross-functional team of 8 engineers, data scientists, and ML specialists, owning hiring, technical roadmap, and delivery for a data-driven SaaS platform serving 10+ aviation and maritime enterprise customers.
- Architected and deployed production AI/ML models with MLFlow over real-time vessel and aircraft sensor data, generating behavioral insights that enabled customers to collectively reduce fuel consumption by 50+ metric tons of CO₂.
- Designed a scalable medallion pipeline within a Databricks Data Lakehouse, optimizing PySpark-based ingestion to achieve 5x performance improvement and reduce infrastructure costs by 20%.
- Shipped AI-powered features on top of gold data using Databricks Genie Space, enabling natural-language analytics over the semantic layer so fuel managers could self-serve insights without SQL.
- Spearheaded the migration of the customer-facing webapp backend to a microservices architecture on AWS, improving load times by 60% and enabling horizontal scalability.

LuckyApp — Senior Software Engineer

Feb 2021 — May 2021

3 months · Remote, part-time · Egypt

- Built a B2B reward-based employee engagement platform from the ground up using ReactJS and NestJS on AWS, delivering MVP within the engagement window.

Agnos Inc. — Senior Software Engineer

Oct 2018 — Aug 2019

1 year · Remote · Miami, FL

- Conducted 20+ technical interviews and drove the adoption of emerging data engineering and cloud technologies across the engineering org.
- Contributed to CareCloud as Senior Software Engineer, leading UX improvements for the Practice Management Control Center used by 7,000+ healthcare providers.

SKILLS

- Core engineering*
 - Technical Leadership
 - Full-Stack Development
 - Python / NodeJS
 - ReactJS
 - SQL / NoSQL
 - AWS
 - Databricks
 - Data Engineering
 - CI/CD Automation
 - Agile Development
- AI / LLM stack*
 - LangChain
 - OpenRouter
 - Claude / GPT / Gemini
 - Agent Orchestration
 - Agentic Systems
 - RAG Pipelines
 - MCP & Skills
 - Databricks Genie / MLFlow
 - n8n Automation

EDUCATION

Bachelor's Degree in Systems Engineering

UTN — FRT

4+ years · On-site · Tucumán, Argentina

- Co-founded and led the engineering of 8 cloud-native SaaS products for Argentine SMBs using ReactJS and Node.js on AWS, focused on scalability and operational performance.

§ 01 · b Earlier Career

Resolvit — Full Stack Engineer Oct 2017 — Oct 2018
1 year · Remote · Buenos Aires, Argentina

- API team at Placester Inc. — migrated legacy Java services to NestJS microservices on AWS Lambda for a B2B real estate SaaS.

VMN+ — Full Stack Developer Jun 2015 — Oct 2017
2 years 4 months · On-site · Buenos Aires, Argentina

- Delivered full-stack work across three sister projects (Primary Insight, eBillity, Valeta) using AngularJS, Java, C#, and Salesforce — collaborating 1:1 with the CTO across the full SDLC.

Viveo Group — Junior Frontend Developer May 2015 — Jul 2015
3 months · Remote, part-time · Tucumán, Argentina

- Built UI modules for a real-time public-bus tracking app in Tucumán.

Globant — Junior Backend Developer Sep 2014 — Jun 2015
8 months · On-site · Tucumán, Argentina

- Contributed to Sears.com backend — Java API integrations and real-time data pipelines with Apache Kafka and Apache Storm.

RECENT

§ 02 Personal Projects · AI / LLM

Non-employment side projects (2023–2026) — practical applications of LLMs, agentic workflows, and multi-model orchestration.

SETR Live Sales Call Assistant 2025

Real-time sales coaching tool (Cluely-style): streams live call audio through Gemini's audio API to surface objection-handling cues and next-best-questions as the call unfolds.

GEMINI 2.5 FLASH · STREAMING AUDIO · REALTIME

FORVM Multi-Model Finance Assistant 2024

Perplexity-Finance-style research assistant for sentiment-driven traders. LangChain orchestration routes each query through OpenRouter to the best-suited model (Claude Sonnet, GPT-4o, Gemini Flash, DeepSeek).

LANGCHAIN · OPENROUTER · OPENAI SDK · MULTI-MODEL

AGROTRACK Agro SaaS for Argentine Farmers > Live 2025

Production B2B SaaS for Argentine farmers: field teams report via WhatsApp (Kapso); Gemini Flash extracts structured data from free-text and reconciles it against the operational plan, expenses, and stock.

GEMINI FLASH · OPENROUTER · WHATSAPP · KAPSO

NUMBERS Chat-with-your-Power-BI 2024

Conversational analytics for agro managers — text-to-SQL on top of the existing Power BI semantic layer, so natural-language questions resolve against the same metrics the dashboards use.

LANGCHAIN · OPENAI · POWER BI · SEMANTIC LAYER

BOT JUDICIAL TUC WhatsApp Legal Bot > Live 2024

Automation for Argentine lawyers — n8n workflow polls judicial portals for each client's expedientes and delivers a weekly WhatsApp summary of case-status changes per casillero.

N8N · WHATSAPP · WEB SCRAPING · AUTOMATION
